Ex. 6 Personal Privacy (PP)

Thank you for agreeing to talk this afternoon. Suggested agenda:

1. Karla summarize what current knowledge re potential contamination from storm drains
2. If EPA were site lead, what would we do in Parcel G?
3. What would we do in other Parcels, e.g. Parcel B?
4. Could we start 1st in Parcel G and see what the results are and then decide on others later?

For reference, I attach one concept I sent before. Maybe some of these ideas could be salvaged in locations where we have lower concerns?
